

COVID-19 Vaccination Information

Essen Patients and Community Partners:

As of January 15, 2021, Essen Health Care has reached the maximum capacity for all COVID 19 Vaccine Appointments based on our current available supply of the vaccine. **As a result, we have temporarily paused appointment availability and hope to resume scheduling as soon as additional supplies of the COVID 19 Vaccine are received.** We are currently in close contact with the Department of Health and are awaiting additional deliveries of the Vaccine. Once additional supply of the vaccine is received, we will lift the pause on appointments and will continue to administer the vaccine to all eligible population under the DOH Guidelines Phases 1A & 1B.

Essen Health Care is committed to the communities we serve, and will ensure we communicate once the COVID-19 Vaccines are available at our designated Essen Health Care Locations. **Please visit us daily, as we are constantly updating our site with new information and will soon share a link for you to enter your information on a patient wait list.**

We are Essen Health Care are committed to our patients and partners, and value your patience during these unprecedented times.
